

Errata Sheet for Minor Corrections and Clarifications to Tentative Order R9-2002-0001

1. Finding 8 (page 3)

Revise the language in the second and third sentences as follows:

8. URBAN STREAMS AS AN MS4 COMPONENT: Historic and current development make use of natural drainage patterns and features as conveyances for urban runoff. Urban streams used in this manner are ~~part of the municipalities MS4 regardless of whether they are natural, man-made, or partially modified features. In these cases, the urban stream is both an MS4 and a receiving waters.~~

The change clarifies the Finding in response to comments received during the Public Hearing.

2. Table 4 Orange County Copermittees by Watershed for the San Juan Creek Watershed Management Area (page 44)

Remove "(inc. July 2001)" in the second row in reference to Aliso Viejo.

The reference to the incorporation date of the City of Aliso Viejo is not necessary in this table, which addresses the relationship of each Copermittee to watersheds and receiving waters within the San Juan Creek Watershed Management Area.

3. Sections K, L.2, O.5.c, Table 25 Task 27, Table 6, Submittal 14

Change the date from July 9, 2003 to August 13, 2003.

The change represents the 18 month development and implementation schedule for the Watershed Urban Runoff Management Program Document.

4. Section O.5.g, Table Attachment B section B.2.b.7

Change the date from June 1, 2002 to August 13, 2002.

The change represents the 180 day implementation schedule following adoption of the Tentative Order.

5. Attachment B, section B.2.b.8.a.1.b

Change the date from June 2002 to October 2002.

The change makes the requirement consistent with the submittal of the Receiving Waters Monitoring Program Document and the 180 day implementation schedule for the Receiving Waters Monitoring Program.

Change Attachment B Footnote 2 as follows:

Bioassessment sampling shall be performed in May and October each year, ~~except 2002 in which the Spring sampling shall be performed in June.~~

The change makes the start of the bioassessment monitoring consistent with the implementation of the Receiving Waters Monitoring Program.
